

Senate of Canada – Committee Rooms Ottawa, Ontario 2004

In the spring of 2004, the Senate of Canada had two fully automated committee rooms installed in the newly renovated Victoria Building. AEL designed, supplied and installed these two committee systems based on the prototype committee system which we designed a year earlier.

All precision robotics are either Vinten or Radamec. We have installed nearly 100 robotic heads in broadcast studios and legislatures in Canada.

*Senate of Canada
40 Elgin Street
Ottawa, Ontario*
