

Swedish Television (SVT) – Television Broadcast Suites Athens, Greece

SVT is the Swedish public service company with two transmitting channels, SVT1 and SVT2. The company is owned by the Administration Foundation for Swedish Television LTD, the Swedish Radio LTD and the Swedish Uducationradio LTD. SVT is the oldest TV organization in Sweden, established in 1956. The entire Swedish TV population has access to these two channels, thereby making them the two largest TV-channels in Sweden. SVT's programming consists of news and weather, movies, comic strips, entertainment/family programs, documentaries, and children's programs.

SVT is a broadcaster for the Olympic Games with the rights through EBU (European Broadcast Union). In Athens, they broadcasted 150 hours of Game coverage. AEL supplied and installed their broadcast system since the Olympic Games in Sydney, Australia. The system includes a Production Control VTR area, Master Control, 3 Edit Suites, and 1 Voice Over Booth, along with 5-7 ENG kits. They also share the Grass Valley Trinx Router system with the NOP Group (YLE-Finland, DK-Denmark and NRK-Norway).

System Solution:

- (1) Grass Valley Kalypso 3 M/E Production Switcher
- (14) Panasonic DVCPRO Tape Format
- (3) Avid News Editors
- (1) Soundcraft Audio Mixer
- (1) Grass Valley Trinx Router 256x256 with embedded Audio
